3. Fire Department
4. Electricity Department
5. Power Grid
6. Para Forces
7. Urban Local Bodies
8. Health Department
9. Ordnance Factories
10. Warehouses
11. Transport Department
12. Municipal Corporations

**Inflates in 2 Minutes  
Without Any Pole**

## Conventional Tents

## Inflatable Tents Without Poles

|                         | Conventional Tents   | Inflatable Tents Without Poles   |
|-------------------------|--|--|
| 1. Weight               | Conventional tents are too heavy due to their poles & stands.                        | Inflatable tents are very light weight as they don't require any poles & other supporting structure.                 |
| 2. Time to Set-Up       | Conventional tents normally take 1-2 hours to set-up.                                | Inflatable Tents take only 2-3 minutes to inflate.   |
| 3. Manpower Requirement | To set-up conventional tents 3-4 persons required.                                   | Only ONE person can inflate these type of tents  |
| 4. Waterproof           | Conventional tents can not withstand in heavy water flow.                            | As Inflatable tents are made up of special graded PVC material, which can resist the heavy water flow.               |
| 5. Insect Proof         | Conventional tents are not insect and snake proof as they are not completely sealed. | Inflatable tents are in single piece with attached ground sheet, which protect snakes, rodents and insects to enter. |

## Applications:-

- ✦ Temporary Establishment    ✦ For Reserve Battalions
- ✦ At Check Posts    ✦ As Temporary Store/Tool room
- ✦ For training Units    ✦ As Temporary Field Offices
- ✦ Relief camps for Disaster management/Hospitals
